STEPHAVEN

A cozy town builder for iPhone where the only currency is the steps you walk.

THE IDEA

Steps from Apple Health become points, and points buy cottages, gardens, canals, trains and villagers for a little town that grows as you walk. A short stroll buys a garden; a long weekend hike might buy a lighthouse. There are no ads and points can never be bought, so every house in the town is one you walked for.

AT A GLANCE

RELEASED	October 27, 2026 (1.0.1 on October 29)
DEVELOPER	Brody Richmond, a solo indie developer in the United States
PLATFORM	iPhone, iOS 26.5 or later, portrait and landscape
CATEGORY	Games (Simulation, Casual), with a Health & Fitness angle
PRICE	Free to play. Optional StepHaven+ membership (more building shapes, styles and collections) and item packs. Points are only earned by walking, never bought.
ADS	None
LANGUAGES	English, German, Spanish, French, Dutch, Portuguese, Japanese, Korean, Traditional Chinese
LINKS	stephaven.app · apps.apple.com/app/id6817135263 · press kit: stephaven.app/press

WHAT'S IN IT

- Over 500 things to build, including more than 40 kinds of tree
- A Workshop for designing your own houses, cottages and shops
- Villagers who move in, wander, chat and visit each other
- Real time of day, weather and seasons: dawn mist, lamplit nights, fog, winter snow
- A travelling fair on every real full moon, and other visiting merchants
- A daily present, and wild animals that visit
- Shared towns: build one town with up to four people over iCloud
- Every building, tree and animal drawn in code

FOR EVERY KIND OF MOVER

- Wheelchair pushes from Apple Watch count like steps
- Ember: light it before a ride, swim or other workout and that exercise earns too
- Follows iOS accessibility settings: Reduce Motion, Reduce Transparency, Increase Contrast, Differentiate Without Color

BUILT WITH APPLE TECHNOLOGY

- HealthKit for steps, pushes and workouts
- Home Screen and Lock Screen widgets
- A Live Activity and Dynamic Island for Ember
- Siri, Shortcuts, Control Center and the Action button
- CloudKit for shared towns and iCloud backup

PRIVACY

Step, push and workout data is read on the phone and never sent anywhere. No accounts. Analytics are anonymous.
